

The logo for ANRT (Association Nationale Recherche Technologie) features the letters 'anrt' in a stylized, lowercase, blue font. The 'a' and 'n' are connected, and the 'r' and 't' are also connected. The letters are bold and modern.

ASSOCIATION NATIONALE
RECHERCHE TECHNOLOGIE

**MAKING FRANCE
STRONG THROUGH
RESEARCH**

EVERY DAY

ANRT answers your questions on the rules for participating in the **Horizon Europe R&I framework programme**

EVERY WEEK

ANRT sends you a **documented press review** covering all subjects related to research & innovation in France, Europe, and worldwide.

ANY TIME

ANRT gives you access to its **information space** featuring over 4,000 items on higher education, research & innovation.

EVERY OTHER MONTH

ANRT gives the floor to:

- leaders from business and research institutions
- representatives of research & innovation policies in other countries.

EVERY OTHER MONTH

ANRT's Europe & Prospective Newsletter brings you analysis from our experts, a view of how the French R&I system is organized, and first-hand accounts.

THREE TIMES A YEAR

ANRT organizes national symposiums:

MARCH: Constructing & organizing research partnership relations

Strategies of public and private players, skills and resourcing, applying diversity in teams and approaches, intellectual property, etc.

JUNE: Annual review of new practices

Taking an original theme-based approach, members look at how new technologies impact evolving processes, R&D, goods and services.

DECEMBER: Science, Innovation & Society

How research & innovation can help tackle the major challenges of today and tomorrow.

CLUB EUROPE, INNOVATION, COMPETITIVENESS

• EUROPEAN RESEARCH AREA

Created in 1998 to improve members' success in their bids for EU projects.

The group's work involves analysis of the rules for participation by our experts, exchanges between members, and production of position papers directly addressing leaders at the European Commission.

• INNOVATION & COMPETITIVENESS

Dating from 2011, this group publishes an annual survey of how research tax credit improves the economic performance of French companies through an international comparison made possible thanks to concrete data contributed by ANRT members. The ANRT's capacity to gather these sensitive data illustrates the level of trust of its members.

• DATA FROM RESEARCH TO BUSINESS

This group was created in 2018 to help members get the most out of the growth of open science resulting from the European Three Os strategy: Open Innovation, Open Science, Open to the world.

* Training activity registered with the prefect of Ile-de-France region under the No. 117 55 65 98 75

SME-MIDCAP INNOVATION & TERRITORIES CLUB

Reserved to eponymous companies, club meetings aim to help business leaders understand public research, EU programmes, relations with major companies and territories through exchanges between participants.

INNOVATION SCHOOL

The school provides intra- and inter-company training*. Courses are aimed at research & innovation professionals in both private and public sectors with a focus on the organization, regulation and financial principles of Horizon Europe programmes.

The INNOVATION STUDIO offers action-based training workshops that put SMEs in direct contact with major public research institutions to approach solutions through R&D with no intermediaries.

ReSCI, MA RECHERCHE J'EN PARLE ! (doctorate soapbox)

Since 2014, these events chaired by well-known scientific personalities regularly give the floor to Cifre doctoral students. The audience is made up of professionals, academics, ANRT members or Cifre supervisors, and other PhD students.

ANNUAL ANRT LUNCH PARTY

ANRT brings all of its members together at this gathering chaired by a high-level political figure. The event illustrates the interest of public authorities in our activities and demonstrates the strength of our network.

FUTURIS MAJOR PLAYERS CLUB

With its recognized capacity to dialogue with public authorities, ANRT has a mission to collectively represent its members.

This club is organized into theme-based groups chaired by different well-known figures. Themes and deliverables are defined for one year, but may be pursued as long as they remain relevant.

The idea is to build multi-sectorial collective intelligence to come up with concrete guidelines, applicable recommendations to move research forward, demonstrators, innovations, etc.

The work involves producing white papers and organizing conference-debates and meetings with French and European ministers or their advisors.

ANRT is recognized for its impartial stance and its capacity to express a joint opinion that is fair, well-balanced and in the interest of progress.

THEMES

• FRENCH RESEARCH & INNOVATION SYSTEM

ANRT's historic pillar of influence involves the questioning of public research policies in France by its members. The focus is on support measures for research-development partnerships between public and private players.

• DIGITAL STRATEGY FOR INDUSTRIAL POLICY

Members examine the key role played by RDI infrastructures in inter-company digital platformization. This group works on developing common benchmarks for data value chains.

• NATIONAL ENERGY RESEARCH STRATEGY (SNRE)

The SNRE aims to identify research priorities likely to foster the energy transition, subject to national competitiveness. This group conveys to public authorities its vision of what is needed to inform research programming and the means required.

• PROSPECT OF A HUMAN PRESENCE ON THE MOON

In this group, actors from within and beyond the space industry combine vision, innovation and communication to feed into the project of a sustainable base camp on the Moon. Inter-sectorial mobilization fosters the development of totally new partnerships and business models.

• ECOLOGICAL TRANSITION

Taking a pragmatic approach, this group builds a community of actions to establish research and development programmes.

• LEARNING THROUGH GAMES

ANRT brings together a group of actors dedicated to producing mostly digital educational tools to learn through games, and more widely, to take a fresh look at teaching concepts.

L'ANRT coordinates the CIMED Creativ-lab as part of the AMPIRIC project.

Research & innovation, key drivers of the French economy and its international development.

Chaired by Patrice Caine, CEO of Thales, ANRT gathers actors from private and public research. Its members currently represent three-quarters of the French research effort.

Created in 1953, ANRT is an established player in research & innovation, with a focus on helping academic and private spheres work together.

ANRT's ambition is to take advantage of its history, the relationship of trust it maintains with its members, and the attention paid to it by public authorities.

Its major asset is its capacity to bring together public and private actors from all business sectors and all scientific disciplines.

ANRT builds up collective intelligence both for the benefit of its members and to influence the organization of research & innovation in France and Europe.

Unique in Europe, ANRT contributes to French competitiveness through its missions:

- allow all companies to access research & innovation
- represent research & innovation to public authorities
- build up collective intelligence that benefits every one of its members
- foster partnerships
- operate the Cifre programme.

On behalf of the Ministry of Higher Education, Research and Innovation, ANRT runs the Cifre doctoral training programme, featuring 4,687 active partnerships, signed with companies of all sizes from all business sectors.

ANRT IN 2020

353

legal entities

6,350

natural persons

2,591

Cifre employers

Become a member of ANRT and:

- 
- **Belong to the leading French research and technology network**
 - **Access a rare, systemic, panoramic overview of research in France**
 - **Benefit from the collective intelligence of theme-based groups**
 - **Influence national strategies**
 - **Participate in the creation of ecosystems**
 - **Meet public and private partners**
 - **Meet high-level French and foreign personalities**
 - **Take part in disruptive thinking**
